Michigan Lakefront Solutions LLC is a Michigan based small business in the Lake and Pond Management Industry. With over 40 years of combined experience, our staff takes pride in restoring Michigan's abundant aquatic resources. With a vision towards the future, we use best management practices and a professional ethic to give future generations the ability to enjoy the lakes and ponds as we did growing up. Working closely with homeowners, associations, governmental boards and state regulators, allows us to provide the best outcomes on every project. We offer services from helping with product selection for pond owners, to whole lake management services, providing transparency and guidance throughout the entire process. Our goal is for customers to fully enjoy the visual and recreational asset that lakes and ponds offer.

Michigan Lakefront Solutions sets itself apart by:

- Posting projects 24-72 hours prior to any application
- Proactively adding enzymes to all treatments in an effort to limit "muck" build-up
- Same-day reaction to customers for quick issue resolution
- Personal one on one interactions
- Focusing on best outcomes vs. rapid growth at any cost

As in our standard treatment contracts, Michigan Lakefront Solutions offers our customers an assurance of no "add-on" charges (trip fees, fuel surcharges, survey fees, etc.) The price is the price. We also provide full transparency throughout the project. We offer a chain of custody for all products that we apply for our customers. We encourage active participation in our endeavor of educating lake residents about responsible restoration of our valuable aquatic resources.

Proper management, education and nutrient abatement will help prevent harmful and toxic algae blooms.

Use of limited control measures, to maintain a proper fish and wildlife habitat while reserving non-selective solutions to areas for swimming and recreation.

Promoting a sustainable and healthy environment through the selective control of exotic plants.

Small Business/ Michigan Based, Dedicated to Restoring Our Resources

Certified Airmax®
REPAIR CENTER

THIS CERTIFICATE IS PROUDLY PRESENTED TO

Michigan Lakefront Solutions

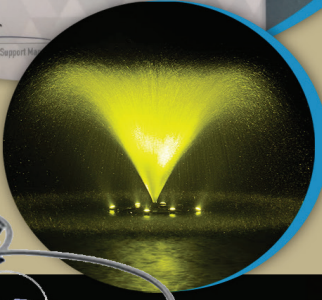

for completion of the C.A.S.I. Program on March 15th, 2022.
This certifies that the above company is staffed with a Certified Airmax Service Technician who is authorized to perform repairs on Airmax products.

Michigan Lakefront Solutions is a factory certified service center for Airmax and Kasco Systems. We also service other brands of fountains and aeration systems. Let our technicians take care of issues at your site or we can take units back to our service center.

We also offer storage of your fountains in our heated facility. We will remove, clean and check for any issues of your fountain float, motor, and lights. Please call for a service or storage quote.

EcoSeries Floating Fountains

AIRMAX®

- **High Flow, Energy Efficient, Maintenance Free Design**
- **Includes 3 Breathtaking Spray Patterns**
- **Optional Color-Changing LED Light Sets**

The Airmax EcoSeries Floating Fountain showcases beautiful industry leading spray patterns that outmatch other 3/4 HP and 1 HP fountains. The EcoSeries Fountain operates in as little as 24" of water depth and includes an energy efficient 1/2 HP stainless steel motor, motor lead, oversized modular intake screen with strain relief and underwater disconnect. Each fountain also includes 3 spray patterns, control panel and a 100' poly flex power cord (more lengths available) and includes a 3 Year Warranty. Fountains can be purchased with or without color-changing LED light set. Installation services available.

Kasco

We are proud to announce a partnership with Kasco, a leader in the Surface Fountain and Sub-surface aeration business. This partnership will allow us to provide additional options for our customers and their water circulation needs. We completed the training process to become a factory certified repair provider.

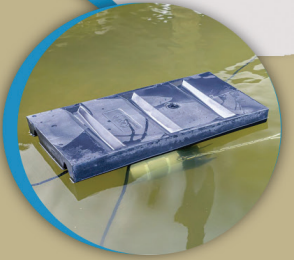

Kasco Aquaticlear

Clog-Resistant Waterfront Management
Keep your shoreline clear with the only clog-resistant circulator. Ideal for those problem areas that collect loose debris and sediments.

Kasco Surface Aerators

Kasco Surface Aerators are efficient, high-performing units that introduce large amounts of oxygen into the water. Kasco Surface Aerators can be used in deep and very shallow water bodies. Pair with optional LED Lighting for additional charge.

Kasco VFX Series

Kasco VFX Series is the choice for an elegant display with superior aeration benefits. This high-flow unit is efficient, easy to install and operate, and are ideal for many situations.

Kasco®

LED Lighting

LED light kits provide classic elegance into the evening hours. Designed to create an impressive color display, LED lighting systems allow you to change colors easily with a remote control.

What Does Aeration Do?

Aeration mixes the pond so toxic gasses are efficiently released and life-giving oxygen readily replaces it. An aerated pond will be clearer, cleaner, and have less bottom muck than a pond without aeration. A pond without aeration will become stratified into two very separate layers in the summer heat.

Benefits of Aeration

- ✓ Reduce Muck
- ✓ Increase Circulation
- ✓ Eliminates Thermocline
- ✓ Improve Water
- ✓ Boost O2 Levels
- ✓ Reduces Fishkill

Custom Pond Aeration Systems

Aeration Systems are fully customizable to aerate ponds, canals or even large bays. Utilizing energy efficient compressors and designs that provide maximum airflow to the latest in diffuser design. A properly aerated pond will improve conditions for fish health, reduce algae blooms and decompose organic material in the water body. Project design services, installation and service programs available.

BEFORE

lake bottom sludge
excess vascular plants
lack of oxygen
green water
potential for fish kills

AFTER

reduced sludge accumulation
minimal plants & algae
abundance of oxygen
clear water
Increase in fish & aquatic life

Today, most aquatic ecosystems are bombarded with excess nutrients from multiple sources, including urban and rural runoff, fertilizers, and waterfowl. Unfortunately, the naturally occurring bacteria cannot keep up with this influx of nutrients. This leads to a shift in the natural balance in ponds and lakes and encourages the build-up of bottom muck, odor, and poor water quality.

ClearLake™ Muck Eliminator Tablets ClearLake™ Muck Eliminator Tabs remove muck and odor in high traffic zones like beaches, shorelines, docks and swimming areas by utilizing highly concentrated and specialized bacteria strains to do their work. ClearLake™ Muck Eliminator Tabs quickly fall through the water column and sink into bottom muck where they begin to grow and spread, slowly digesting organic material as their colonies exponentially multiply.

Initial Application: 6 lbs. Per Surface Acre of Water. Maintenance Application: 2 lbs. Per Surface Acre Every 2 Weeks Apply when water temperatures are above 50 F. 4lbs for \$99.99, 8lbs for \$180.00, 24lbs for \$450.00

ClearLake™ Pond & Lake Clarifier ClearLake™ Pond & Lake Clarifier starts working instantly to clean and clear your pond or lake. ClearLake™ Pond & Lake Clarifier utilizes billions of unique strains of beneficial bacteria to breakdown the suspended organic material that causes off-color in the water column. The result is a healthy, natural ecosystem perfect for fishing, swimming or boating.

Convenient Water-Soluble Bag Application: 1 Water Soluble Bag = 8 oz. Initial Application: 6 lbs. Per Surface Acre of Water Maintenance Application: 2 to 3 lbs. Per Surface Acre Every 2 weeks when water temperatures are above 50°F. 4 lbs. for \$99.99, 8 lbs. for \$180.00, 24 lbs. for \$450.00

EasyPro™ Blue Pond Dye Packets (Water Soluble Packet)

Similar to liquid dye, but in a convenient water soluble packet! Just toss one pond dye packet into your pond to treat. Apply early in the season for best results. 2 pond dye packets will treat a 1 acre pond 4'-6' deep. 2 packets are equal to one quart of liquid pond Dye. Easy Pro is the ideal blue pond dye for decorative ponds as it contrasts perfectly with lush green landscaping.

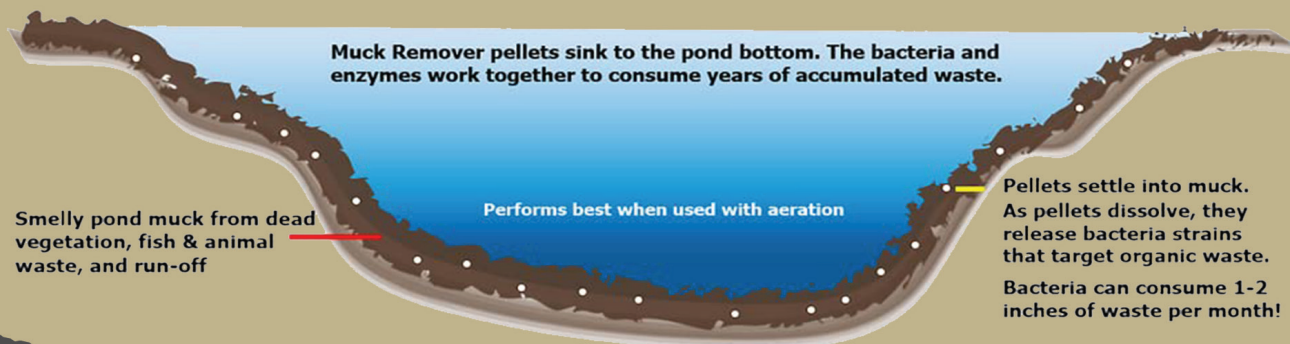

Application rate: 1 packet per 1/3 acre. \$39.99 for 4 packets

EasyPro™ Serenity Pond Dye Packets. (Water Soluble Packet)

Serenity Lake Dye Packets provide a blackish-blue tint for a darker more natural look. Apply early in the season for best results. 2 pond dye packets will treat a 1 acre pond 4'-6' deep. 2 packets are equal to one quart of liquid pond Dye.

Application rate: 1 packet per 1/3 acre. \$39.99 for 4 packets

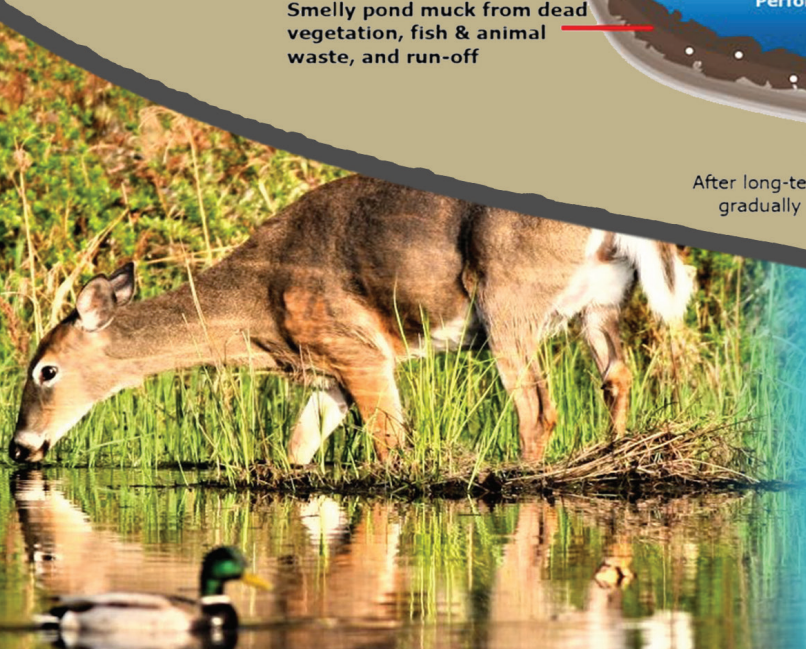

What happens to the muck?

After long-term treatment, the pond/lake bottom muck is gradually converted to a fine-grained, compact soil.

Features & Benefits Of ClearLake™ :

- Cleans & Clears Entire Water Column
- Reduces Harmful Organic Material
- Removes Noxious Odors
- 100% Safe & All-Natural

Citrine-Plus (Liquid)

Citrine-Plus liquid is the #1 selling algaecide in America! This product controls a vast majority of problematic algae. Citrine-Plus is formulated with a low copper compound ingredient to help reduce the oxygen depletion for wildlife.

Application rate: .6 - 1.2 gal. per acre foot \$49.99 per Gallon

Hydrothol-191 (Granular)

Our #1 seller for submersed weed control! It is very effective against a broad spectrum of aquatic weeds, while also controlling algae at the same time. Hydrothol is the ideal product for use around docks, beaches, boat wells, and back yard ponds.

Application rate: 3-80 lbs. per acre foot. \$149.99 per 20 lbs. Bag, \$274.99 per 40 lbs. Box

Propeller (Granular)

Propeller delivers fast and selective control of tough invasive and nuisance plants such as Cabomba, Watermeal, Eurasian Watermilfoil, Duckweed, and more. Propeller is formed into quick-dissolve granules that mix effortlessly in water for easy use. Propeller dissipates quickly from the water column and does not accumulate in sediment.

Application rate: .53 - 2.1 lbs, per acre foot. \$89.99 per 1lb container \$299.99 per 5 lbs. Container

Sonar One

The best product for easy control of most aquatic plants. SonarOne's pellet formulation delivers an effective dose to targeted plants within the first day, while providing a longer-lasting residual for season long control. The easy-to-apply pellet formulation eliminates overspray onto sensitive shoreline vegetation.

Application rate: 1 - 5 lbs. per acre foot \$319.99 per 5 lbs. Container

Shoreline Defense Plus Booster

Shoreklear Plus is a systemic herbicide which kills the plant roots for multi-year control. It is effective on emergent plants like cattails, rushes, Purple Loosestrife and water lilies. Works great for ponds, beaches, and anywhere emergent weeds grow. Shoreklear Plus has a non-ionic surfactant included which gives you

**two products for the price of one!
\$59.99 per Container**

Aquathol-K (Liquid)

Aquathol-K controls submersed weeds in lakes and ponds. Aquathol-K will begin to work on contact with submersed weeds to break down cell structure and inhibit protein synthesis; without this ability the weed dies. **Application rates: 1.3—1.9 gal. per surface acre foot. \$149.99 per Gallon**

Reward

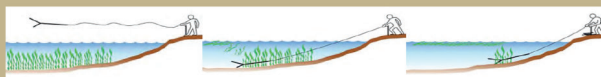

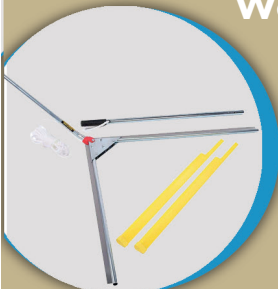

Reward controls over 15 aquatic weeds, making it one of the broadest spectrum aquatic herbicides available. Reward acts fast by interfering with photosynthesis, which doesn't allow the plants to survive. Reward can be used on submersed plants, as well as some emergent plants.

Application rates: 1-2 gal. per surface acre. \$159.99 per Gallon

Weed Razor™

Cut through tough weeds in minutes! Cut in deep or shallow water with razor sharp cutting edge that gives very little resistance because it slices the weeds rather than dragging them. Clears 4' path each throw! Includes 25 feet of rope and blade sharpener. **\$174.99**

QUICKLY CUTS AQUATIC WEEDS & GRASSES AT THEIR BASE
